Dear Ms. Ngan Mai and the Sunbytes Recruitment Team,

I am writing to apply for the Junior Fullstack Developer (JavaScript) position at Sunbytes. My name is Lon Yar Hao, and I am a Myanmar national currently living in Ho Chi Minh City. I have a strong passion for web development and hands-on experience in both frontend and backend technologies.

I studied Computer Science at the University of Computer Studies Yangon, and I am currently pursuing a Bachelor of Science in Computer Science at the University of the People. Along with my academic studies, I completed a Fullstack Developer Course at Code Lab, where I strengthened my practical skills in HTML, CSS, JavaScript, Bootstrap, PHP, Laravel, Vue.js, MySQL, and responsive web design.

I have applied these skills through real-world projects, including a Laravel-based POS system with authentication, CRUD features, and reporting, as well as a Media Platform built with Laravel for backend and Vue.js for frontend. These projects helped me learn how to structure code properly, work with APIs, manage state, and create responsive, user-friendly interfaces.

I am also self-studying ReactJS to improve my JavaScript foundation and stay aligned with modern frontend development. I can communicate well in English and have experience working in multicultural environments, which I believe suits Sunbytes' international setup.

I am very interested in Sunbytes because of its supportive culture, focus on learning, and opportunity to grow within a global team. I am eager to contribute to your projects while continuing to improve my frontend and backend skills.

Thank you for reviewing my application. I would be happy to discuss how my technical background, education, and motivation can contribute to Sunbytes' success.

Sincerely,
Lon Yar Hao
